

SRINIVAS R C

AI/ML Engineer

Bengaluru, Karnataka | +91 72049 54568 | srinivasrc0408@gmail.com | github.com/srinivas-rc0408

PROFESSIONAL SUMMARY

Results-driven AIML undergraduate with proven experience building end-to-end ML pipelines, LLM-powered applications, and autonomous agentic AI frameworks. Proficient in Python, Linux (Arch Linux, Ubuntu), and MLOps tooling. Certified by IIT Ropar/NPTEL in Deep Learning and Microsoft in Software Engineering. Seeking an AI/ML engineering internship to drive real-world impact.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, SQL

AI/ML & LLMs: Machine Learning, Deep Learning, NLP, LLMs, Prompt Engineering, Agentic AI, Feature Engineering, MLOps

Frameworks & Libraries: Scikit-learn, Pandas, NumPy, OpenCV, MLflow, Streamlit, TensorFlow

OS & Platforms: Linux (Arch Linux, Ubuntu, Pop!_OS, Mint), Windows, Git, GitHub, Antigravity, VS Code, Jupyter Notebook, Google Colab

Web & Core CS: HTML, CSS, Frontend Development, UI/UX Design, Data Structures, DBMS, OOP, Computer Networks

PROJECT EXPERIENCE

ArchAgent — Agentic AI | Python | LLM APIs | Prompt Engineering | Streamlit | Git | github.com/srinivas-rc0408/ArchAgent---Agentic-AI

- Engineered a modular agentic AI framework that automates structured dataset generation, reducing manual data creation time by an estimated 40%.
- Architected production-ready workflows utilising prompt chaining and custom tool integrations to execute 5+ sequential reasoning tasks autonomously.
- Designed a scalable system architecture incorporating configurable memory components alongside a responsive Streamlit user interface.

Health Risk MLOps | Python | Scikit-learn | MLflow | Git | github.com/srinivas-rc0408/health-risk-mlops

- Built an end-to-end MLOps pipeline to fully automate training, evaluation, and production deployment stages of health risk prediction models.
- Implemented strict model versioning and continuous performance monitoring by integrating MLflow, reducing tracking overhead across all experiments.
- Designed 4 reproducible, modular pipeline stages ensuring seamless data preprocessing, feature tracking, and standardised evaluation.

Bank Churn Prediction System | Python | Scikit-learn | Random Forest | Streamlit | github.com/srinivas-rc0408/bank-churn-ui

- Achieved 85%+ operational classification accuracy on structured banking datasets by training predictive models using Random Forest algorithms.
- Executed advanced data preprocessing and automated feature engineering workflows to optimise evaluation metrics and resolve class imbalances.
- Integrated an interactive, low-latency Streamlit frontend to deliver real-time churn probability scores directly to end-users.

NLP Language Detector & Translator | Python | NLP | Scikit-learn | github.com/srinivas-rc0408/Language-Detector

- Architected an NLP web application pipeline utilising Scikit-learn to accurately classify and process multilingual text inputs.
- Developed highly efficient text preprocessing and translation workflows to extract key semantic features across multiple target languages.
- Optimised text tokenisation routines to maintain low-latency inference performance during real-time text classification tasks.

CERTIFICATIONS

- Deep Learning — 12-Week Academic Programme | IIT Ropar / NPTEL | 2025
- Software Engineering Fundamentals | Microsoft | 2025
- Python Programming | 2025
- Machine Learning Certification | Rinex Organization, NSDC / Skill India | Grade: A+ | 2024
- LLM-Driven AI Engineering Bootcamp | REVA University | 2025
- Prompt Engineering Certification | Infosys Springboard | 2025

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning — REVA University, Bengaluru **Expected 2027**

PUC (PCMB) — MES College of Arts, Science & Commerce, Bengaluru **82.5% | 2023**

ICSE — Class X — Mount Senoria School, Bengaluru **88.8% | 2021**

LEADERSHIP & EXTRA-CURRICULAR ACTIVITIES

Core Member & Head of Media — Yantra IoT Club, REVA University

- Spearheaded digital outreach and content creation for university-wide technical events, managing all media assets and communications.
- Organised and promoted 2 technical workshops on IoT architectures and core programming; coordinated career panels featuring professionals from named companies for 100+ students.
